

ABOUT US

Brown Transportation Solutions is a family-owned freight company headquartered in Van Alstyne, TX, approximately sixty miles from the Dallas-Ft. Worth metroplex. We have been in operation for twenty-five years and continue to set our sights on future expansion and growth.

We are an FMCSA-bonded company and, although we primarily provide freight brokerage services, we also own and deploy our own assets through our sister company, BT Xpress.

Our brokerage services include dry and refrigerated LTL and FTL Sprinter, straight truck and 53' units, as well as open-top (hotshot, flatbed, conestoga, etc.) and power-only units picking up and delivering anywhere in the United States. Through BT Xpress, we provide dry and refrigerated FTL 53' unit service picking up in the DFW area and delivering anywhere in the United States.

WHY PARTNER WITH BTS?

At Brown Transportation, we pride ourselves on our ability to:

- Streamline communication by providing a single, easily accessible point of contact for each client;
- Dedicate time and attention to individual clients which, in turn, enhances our focus upon and knowledge of their specific requirements and needs;
- Devote time to negotiating the best rates for our clients within a fluid industry, leveraging the relationships we have established with carriers we have utilized over the past two decades; and
- Build true relationships with our clients rather than reducing them to merely names or numbers in a TMS.
